PELLON® PRODUCT CATEGORIES

What do the different colors on Pellon® Products mean? Each color on a package or label refers to a different product usage as it relates to your project needs. This system helps identify the correct product easily. The segments and the products they include are as follows:

While we have made an effort to put Pellon® products into segmentations to help clerks and consumers choose the right products for their projects, keep in mind that many products will cross over to other segments. For example, 987F Fusible Fleece may be listed as a Quilting item, but it is used extensively in making handbags and tote bags. Also, 950F ShirTailor®, used in shirt collars and cuffs, is listed as an Apparel item, but is also a wonderful stabilizer for t-shirt quilts. The segmentation chart is meant to be a guide only. You can find many alternate uses for our products on www.PellonProjects.com.

NO BACKING	
807 - Wonder-Web® 100% Polyamide Width: 1/4", 5/8", 20" 	Fusible web that replaces the need for sewing or gluing. Use in apparel, home decorating, and craft projects.
LAMINATES	
100 - Vinyl Fuse™ Gloss Finish 100% Vinyl Width: 15", 20" 	Iron-on, paper backed vinyl with a clear glossy finish. UV-rated and water repellent. For use in projects such as placemats and diaper bags. Easy to spot clean.
102 - Vinyl Fuse™ Matte Finish 100% Vinyl Width: 15" 	Iron-on, paper backed vinyl with a matte finish. UV-rated and water repellent. Use for added protection in projects such as placemats and diaper bags. Easy to spot clean.
875 - Lamifix® 100% PES Width: 17" 	Lightweight, transparent, iron-on film for fabric protection. Use in placemats, diaper bags, and lunch boxes. Spot clean.

Sew - In Products Iron - On Products **EMBROIDERY****TEAR AWAY****Style/Fiber Content/Put Up****Description/Project Uses****360 - E-Z Stitch®**100% Polypropylene
Width: 20", 60" / White

Sew-in, perforated lightweight fabric stabilizer that tears away easily. Use as a stabilizer for machine embroidery, cutwork, appliqués, and monogramming.

200 - Tack-N-Fuse®85% Polyester/15% Viscose
Width: 11", 22.5" / White

Pressure sensitive, fusible embroidery backing that eliminates the need for a separate fusible and stabilizer.

371 - Fuse-N-Tear®70% Polyester/30% Rayon
Width: 8", 12", 20" / White

Fusible, mediumweight embroidery stabilizer that easily tears away. Use for decorative stitching, appliqués, and monogramming.

806 - Stitch-N-Tear®70% Polyester/30% Rayon
Width: 15", 20", 60" / White, Black

Sew-in, tear-away embroidery backing for mediumweight to heavyweight fabrics. Good for machine embroidery, and monograms.

835 - Stitch-N-Tear® Lite60% Polyester/40% Rayon
Width: 8", 12", 20", 60" / White

Lightweight, sew-in, tear-away stabilizer for use in embroidery button-holes, edge work or decorative stitching.

201G1 - Sticky Grid-N-Tear™60% Viscose/40% Polyester
Width: 11" / White

Pressure sensitive stabilizer with a 1" grid for needle art and cross stitch techniques to add stitch support.

201G14 - Sticky Grid-N-Tear™60% Viscose/40% Polyester
Width: 11" / White

Pressure sensitive stabilizer with 14 grid lines per every 1" for needle art and cross stitch techniques to add stitch support.

841 - Stick-N-Tear™60% Polyester/40% Rayon
Width: 8", 12", 20" / White

Pressure sensitive, tear-away stabilizer that leaves no residue. Best for projects that are sensitive to hoop marks.

CUT AWAY**884 - Cut-A-Way Stabilizer**60% Polyester / 40% Rayon
Width: 20" / White

Soft, nonwoven stabilizer for dense stitching.

380 - Soft-N-Stay®100% Nylon
Width: 12", 20", 60" / White

Use in free-form/free-hand designs, t-shirt knits, and dense embroidery designs.

Sew - In Products Iron - On Products **WASH AWAY****Style/Fiber Content/Put Up****Description/Project Uses****541 - Wash-N-Gone®**100% PVA
Width: 19", 58" / White

Nonwoven, all-temperature, water-soluble stabilizer for machine embroidery, appliqué, cutwork, and monogramming.

2301 - Print-Stitch-Dissolve™100% Wood Cellulose
Width: 8.5" / White

Water soluble, printable sheets to use as a stabilizer or foundation. Also great for paper piecing techniques.

2303 - Tear-N-Wash®60% Polyester / 40% Rayon
Width: 12", 19" / White

Nonwoven stabilizer for stabilizing during stitching that washes away completely.

542 - Stick-N-Washaway®100% PVA
Width: 8.5", 19" / White

Pressure sensitive, nonwoven, all-temperature water-soluble stabilizer. Use for machine embroidery, appliqué, cutwork, and monogramming.

542G1 - Sticky Grid-N-Wash™100% PVA
Width: 11" / White

Pressure sensitive, water soluble stabilizer with a 1" grid for needle art and cross stitch techniques to add stitch support.

542G14 - Sticky Grid-N-Wash™100% PVA
Width: 11" / White

Pressure sensitive, water soluble stabilizer with 14 grid lines per every 1" for needle art and cross stitch techniques to add stitch support.

551 - Sol-U-Film®100% PVA
Width: 8", 20" / Clear

All temperature, water-soluble film stabilizer. Use on top of napped fabrics to keep stitches clean. Can use multiple layers for making lace.

553 - Sol-U-Film Lite®100% PVA
Width: 8", 12", 20" / Clear

Lightweight, all-temperature, water-soluble film stabilizer. Leaves no trace of stabilizer when used on top or bottom of embroidery.
